

FIRE FIGHTING SYSTEM UPGRADE FOR FLEXO

Our Fire-fighting system

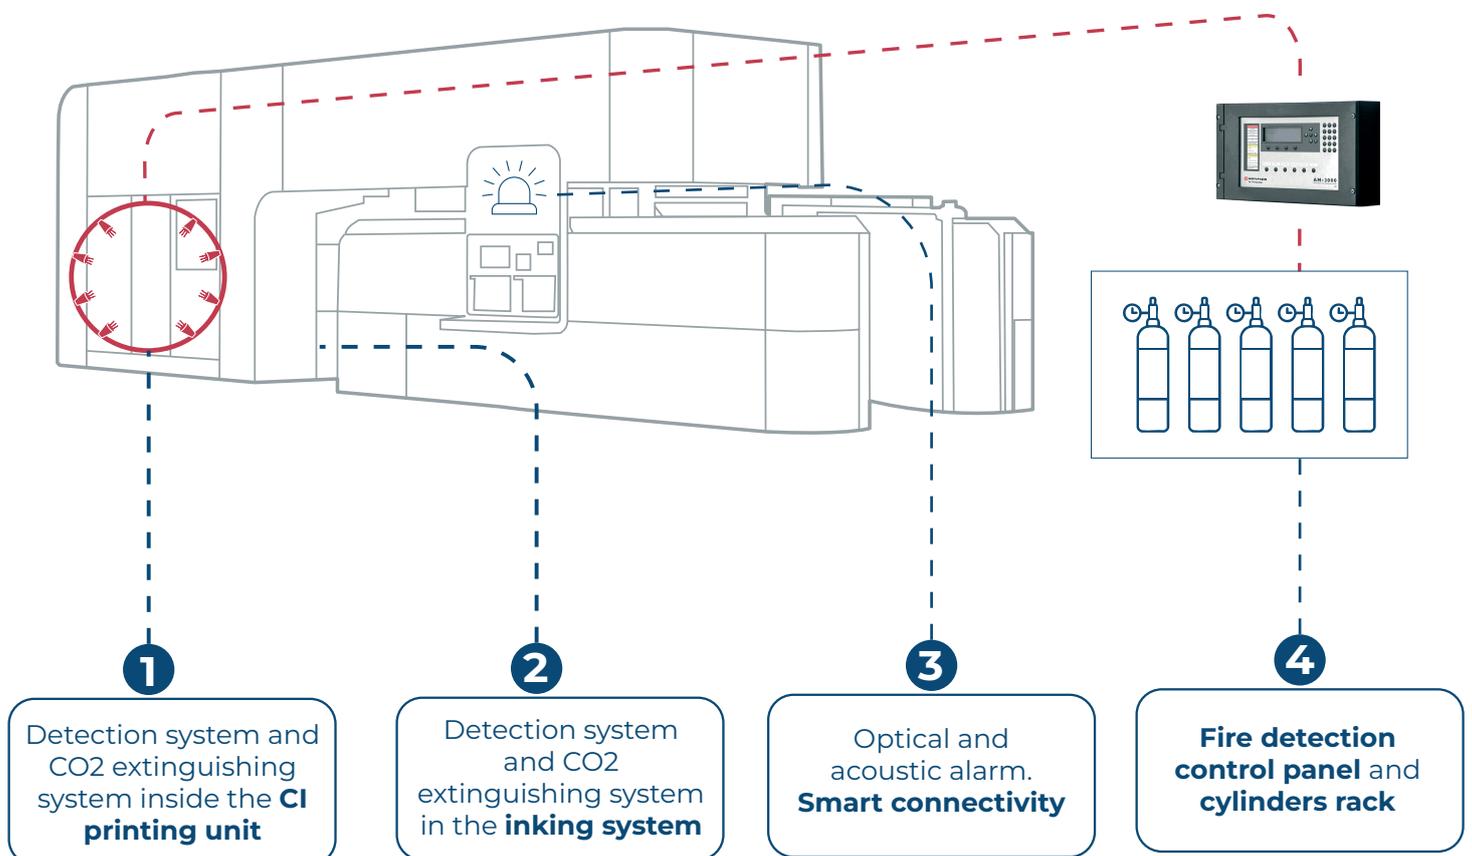

Uteco fire fighting systems provide **scalable protection tailored to your needs**, covering both printing units and washing systems.

With this upgrade, you ensure **maximum safety**, **reduce the risk of costly downtime**, and **keep your operators fully protected**.

WHY UPGRADE YOUR SYSTEM?

1. **Protect** your printing equipment and ensure operator safety for a **safer working environment**;
2. **Minimize impacts and downtimes** of potential fires;
3. **Reduce insurance cost** thanks a certified fire system.

SCOPE OF INTERVENTION

Highlights

Early Warning: Provide prompt alarms allowing for immediate interventions and minimizing impact of potential fire.

Automatic System: The system works fully automatically, eliminating manual actions and minimizing the risk of human error.

Data Log Analysis: Saving of the data log for a detailed diagnosis to ensure the fastest and most effective and optimized machine restore.

Cost Efficiency: By minimizing fire risk, the system helps cut insurance premiums, reduce downtime, and lower overall operating costs, ensuring a safer and more efficient production environment.

Safety: The system safeguards operators from fire-related hazards, creating a safer, more controlled workspace.

CO2 Cylinders Rack

CO2 Extinguishing Nozzles

Why choosing our fire-fighting system?

Maximum safety: total protection for both machine and operators.

Production continuity: minimize downtime and maximize efficiency.

Certified reliability: a state of the art system, fully integrated with Uteco proprietary machine technology.
