GaiaLens

GaiaLens* is a software solution designed to provide you **remote assistance** through the use of smart glasses, smartphones or tablets. Uteco technical team can see what you see **in real time** and interact with you in order to provide the **best solution** for resolving issues.

WHY CHOOSE GAIALENS
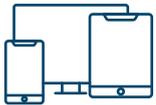

1

Multidevice
GaiaLens works with smart phones, smart glasses and tablets

2

Reduction in intervention times and costs
Thanks to real-time remote assistance and the possibility of immediately involving an expert, travel is avoided, reducing machine downtime and maintenance costs

3

Summary report with AI
Get detailed reports generated by AI, with automatic transcription and summary of each session

4

Pointers and live drawings
With live video annotations, operators receive much clearer instructions, reducing errors or rework

*Note: Remote support through GaiaLens requires an active Remote Technical Assistance contract

Main Devices

You can access **Gaia**Lens quickly and easily from either your smartphone and smartglasses: you can choose whether to access the service **through the app** or **through the smartglasses.**

1 APP

GaiaLens is an **app** that can be downloaded onto your devices, allowing you to communicate with Uteco technicians to request remote technical support.

You can also access a **web version** of the app via your smartphone or tablet.

GAIALENS
Connected

2 SMARTGLASSES

Uteco offers most advanced smart glasses specifically designed and compatible for **hands-free operation** on the machine: through the glasses, you will be able to see what the Uteco technical team shows you with **AR**.

You can source from Uteco the following top tier smart glasses:

Epson Moverio BT-45CS

Featuring a practical headband for maximum comfort, these smartglasses comply with **MIL-STD-810H** , **IP52, and ANSI Z87.1 standards for safety and durability**, making them ideal for remote support, workflow assistance.
They are easy accessible through a practical external touchpad.

Moziware CIMO

Lightweight, hands-free, **monocular smart glasses** designed for industrial use, featuring voice control, noise-canceling mics and **IP66 dust/water resistance** for frontline workers in maintenance, logistics, and manufacturing.
